## SUMMARY

B.Tech Computer Science (Cyber Security) student at VIT Chennai (CGPA: 9.40/10) with experience in cybersecurity, ISO/IEC 27001, AI/ML, and computer vision. Experienced in ISMS audits, research, startup development, and secure software engineering.

## EDUCATION

|                                                                    |                               |
|--------------------------------------------------------------------|-------------------------------|
| <b>Vellore Institute of Technology, Chennai</b>                    | 2024 – 2028                   |
| <i>B.Tech in Computer Science and Engineering (Cyber Security)</i> | <i>CGPA: 9.40/10</i>          |
| <b>Sacred Heart Convent School, Jamshedpur</b>                     | 2024                          |
| <i>ISC Class XII</i>                                               | <i>97.25% — Branch Topper</i> |
| <b>Sacred Heart Convent School, Jamshedpur</b>                     | 2022                          |
| <i>ICSE Class X</i>                                                | <i>98.4% — School Topper</i>  |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                          |

## PROJECTS

---

### Traffic Density Classification using YOLOv8 | Python, YOLOv8, OpenCV, Computer Vision Research Project

- \* Developed a real-time traffic density classification system by fine-tuning a **YOLOv8** object detection model on a custom dataset containing over **5,800 annotated traffic images**.
- \* Performed data preprocessing, augmentation, normalization, and model optimization to improve detection accuracy and robustness.
- \* Research paper submitted to the **Springer Proceedings of ICETTTSF 2025** organized by PSG College of Technology in collaboration with Clemson University (CU-ICAR), USA.

### AI-powered Library Seat Occupancy Detection System | Python, Deep Learning, OpenCV Ongoing

- \* Designed and developed a deep learning system to detect real-time seat occupancy in the VIT Chennai Library using live camera feeds.
- \* Optimized the detection model for continuous inference and scalable deployment in institutional environments.
- \* Project officially recognized by the VIT Chennai Library management for campus-wide deployment potential.

### Advanced DNS Tracking and Honeypot System | Linux, Python, Networking, Cybersecurity

- \* Developed a DNS monitoring system capable of detecting suspicious DNS activity and identifying malicious domains.
- \* Designed and deployed honeypots to capture attacker behavior and collect threat intelligence for security analysis.
- \* Strengthened detection capabilities through secure DNS monitoring and threat correlation techniques.

### CryptX | Linux, Docker, Cryptography

- \* Designed a Linux-based interactive learning environment for demonstrating cryptographic algorithms and cybersecurity concepts.
- \* Built isolated containers to simulate secure computing environments and hands-on security experimentation.

## TECHNICAL SKILLS

---

**Programming Languages:** Java, Python, C, C++, JavaScript

**Cybersecurity:** ISO/IEC 27001, ISMS, Risk Assessment, Information Security, Kali Linux, Web Security, Cryptography, DNS Security, Honeypots, Threat Detection

**Artificial Intelligence & Machine Learning:** YOLOv8, Deep Learning, Computer Vision, CNNs, Reinforcement Learning, OpenCV, Model Fine-tuning

**Web Development:** Next.js, React, HTML, CSS, JavaScript, Firebase

**Tools & Platforms:** Git, GitHub, Linux, Docker, VS Code

**Core CS:** Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, DBMS

## AWARDS & ACHIEVEMENTS

---

### Academic Excellence Award, VIT Chennai 2026

- \* Ranked **4th** in the B.Tech Computer Science (Cyber Security) branch with a CGPA of **9.40/10**.

### Feather in the Cap Award, VIT Chennai Library 2025

- \* Received the **Feather in the Cap Award** from the VIT Chennai Library for developing an AI-powered **Library Seat Occupancy Management System** that enables real-time monitoring of seat availability using computer vision and deep learning.
